

Residential Products

prysmian | ENCORE WIRE®

NM-B Building Wire

Type NM-B may be installed or fished in air voids and joints and in masonry block or tile walls where such walls are not exposed to, nor subject to, excessive moisture or dampness.

NM-B PCS Building Wire

NM-B PCS eliminates the need to install separate low-voltage cable and traditional power NM cable to a single luminaire. Designed for use with LED and Fluorescent dimming systems and smart building technology.

UF-B Wire

Type UF-B is generally used in underground, direct burial installations as branch circuits and/or feeders.

TC-ER SE-R Hybrid® (CU or AL)

Encore Wire's hybrid cable utilizes a more robust jacket than normal SE-R cable, making it less prone to damage during tough residential and commercial installation and is direct burial rated.

SE-Style U (CU or AL)

SE-Style U used from the electric utility service point to the meter or service entrance panel. Also for use in HVAC equipment applications.

SE-Style R (CU or AL)

SE-R can be used for branch circuits to ranges, ovens, cooking units, or clothes dryers. It's also used for remote distribution panels (subpanels).
