ENGINEERING SPECIFICATIONS:

Standards
Underwriters Laboratories Standards UL-96, UL-93, UL-1479, UL-1569, UL-1581, UL-2556; Federal Specification A-A-59544; ASTM-B3 and B8; NFPA70 (NEC®) Articles 250.118(10)(a) and (b), 300.22(2),(1), 330, 392, 396, 501, 502, 503, 504, 505, 517, 518, 520, 530, 645, 725; APRA 2009 Section 1605 “Buy American” Compliant; RoHS Compliant; UL CRD Type MC-PCS - 12/19/2014 (Effective 2/1/2015); MasterSpec Division 26 Sections 260519, 260523, 260519; UL Listing #E-301130

CONSTRUCTION

Conductors
Lighting (Power or Class 1) - Solid 12-10 AWG soft, uncoated copper per ASTM-B3; Class 2 and Class 3 - Solid 16 AWG soft, uncoated copper per ASTM-B3

Insulation
Color-coded Polyvinyl Chloride (PVC) compound meeting the required thickness of Type THHN/THWN-2 with a heat-stabilized Nylon rated for 90°C.

Class 2 and Class 3 Conductors:
Color-coded (purple/gray) 16 AWG twisted jacketed pair with 600V insulation. The National Electrical Code (NEC) and UL 1569 permits electric light and power circuits conductors in an MC Cable with class 2 and class 3 circuits in accordance with NEC Section 725.136(I)(1).

Assembly
Encore’s MC-LED Healthcare cable is constructed with soft-drawn copper, Type THHN/THWN-2 conductors rated 90°C dry. All conductors are individually wrapped with flame retardant, color-matched protective paper with print legend and cabled together to form the cable core. Includes green insulated equipment grounding conductor. The bare aluminum grounding/bonding conductor is located outside the paper wrap and is cabled with the insulated conductors and in constant contact with armor sheathing. Interlocked aluminum armor is applied over the entire assembly which provides additional mechanical protection. Available in Steel and Aluminum Armor.

APPLICATIONS
Type MC-LED Healthcare (Type MC-PCS) with SmartGround technology is designed for use with LED and Fluorescent dimming systems and power management systems in smart building technology for patient care areas/spaces of healthcare facilities to aid in optimal control over the building’s lighting management systems. Type MC-LED Healthcare may be surface mounted, fish in and/or embedded in plaster in normally dry locations. Type MC-LED Healthcare complies with NEC Section 517.13(a) and (b). UL Classified for 1, 2 and 3 hour through penetrations (Fire-Stop). Meets acceptable uses in accordance with NEC 250.118(10)(a) and (b), 300.22(C)(1), 330, 392, 396, 501, 502, 503, 504, 505, 506, 507, 517, 518, 520, 525, 645, 725.

FEATURES
The NEC 250.118(10)(b) recognizes the combination of interlocking armor and bond wire as an equipment grounding conductor. The green insulated copper grounding conductor sized per NEC 517.13(b) and 250.122. Installation costs reduced by up to 50% over raceway and wire. Insulating anti-short bushings are supplied with each reel or coil, but not required per Section 330.40 of the NEC. Suitable for type MG-A fittings. SmartColorID labels are spaced at regular intervals on the exterior of the metal sheathing and are removeable. For ease of installation and pulling, cable is reverse wound on reels. Coils are on the exterior of the metal sheathing and are removable. For ease of installation and pulling, cable is reverse wound on reels. Coils are not required per Section 330.40 of the NEC.

The above data is approximate and subject to normal manufacturing tolerances.
