Window Crimp™ with Sure Grip

THESE SINGLE-USE PULLING CRIMPS ARE THE FASTEST, EASIEST, STRONGEST AND MOST FOOLPROOF MEANS OF MAKING-UP HEADS FOR WIRE PULLS.

HOW TO USE

WINDOW:
Allows for easy visual inspection of wire placement in head before crimping.

SURE GRIP:
Note the internal threads which offer more surface area when crimped, giving these heads their "sure grip" on the wire.

CRIMPED ↓

Insert the bare wire into the head past the window.

Strip the wire to allow full insertion into the head.

iTOOLco guarantees these crimps to perform to specs when installed by one of iTOOLco's Certified Installers. For certification call 865.670.3713.
